## Take the Gamble Out of Telecom

When it comes to your telephones, voice mail and other telecommunications needs, are you leaving too much to chance?

**COMM**WORLD of Kansas City removes the guesswork from selecting a telecommunications company and system. We take a consultative approach that enables you to make an informed decision based upon an understanding of system equipment performance, business objectives, service and other company needs.

As our 24 years in business attest we strive to establish a long-term relationship from our first contact with you and your company. Founded in 1981, **COMM**WORLD of Kansas City is locally owned and operated. Our management team shares more than 89 years of experience working together. This stability and longevity is truly unique in an everchanging industry and it demonstrates our strength. We are part of a national organization—the Technology Assurance Group (TAG) with rigorous qualification standards that ensures your telecom experience is a positive one. These include community reputation, years in business,

financial strength, responsive service and technical expertise. With our membership also comes a guarantee for our unique Five Star Warrant.

Our job is to listen to your needs, understand your business and provide a consultative approach to help you achieve your goals. We are an Authorized Dealer for several leading equipment manufacturers because we know there is no one perfect system for everyone. **COMM**World offers choices, while many competitors "squeeze" every business into a limited product offering or telecom solution.

**COMM**WORLD recognizes the need for a telecommunications solution that combines leading technology with top-quality service and support. Our growth over the years reflects recurring business and referrals we have enjoyed from our satisfied customers. We appreciate your interest in our company's services and invite you to visit our Web site at [www.commworld-kc.com](http://www.commworld-kc.com) for more information. All of us at **COMM**WORLD of Kansas City look forward to the opportunity to be your telecommunications company.
